Subject: Notification of Regulated Waste Activity
Amtrak Cedar Hill Maintenance of Way Base
Hamden, Connecticut

P-WASTE MANAGEMENT UNIT

Dear Ms. Rubecka:

On behalf of the National Railroad Passenger Corporation (Amtrak), Environmental Partners Group, Inc. is submitting the attached Notification of Regulated Waste Activity form for Amtrak's Cedar Hill Maintenance of Way Base. Located at 255 Welton Street (Rear) in Hamden, Connecticut, the facility serves as the headquarters point for Engineering Department personnel responsible for maintaining the track, bridges, and signals along Amtrak's Springfield Line and a portion of its Shore Line. Supplies, equipment and vehicles are stored at the base to support the activities of the following Engineering sub-departments: Bridge and Building, Communication and Signal, Track, and Work Equipment. In addition, road vehicles used for right-of-way maintenance are inspected, maintained, and repaired. No passenger trains are serviced or maintained at the facility.

Hazardous wastes that are currently being generated at the facility are transported offsite for disposal using historical generator identification numbers. At the request of Amtrak, Environmental Partners has investigated these identification numbers and has found that, due to changes in operations and responsible personnel, the historical identification numbers no longer represent the current activities. Therefore, to better coordinate and track their hazardous waste handling and disposal practices, Amtrak wishes to establish a new identification number for this facility.

A review of the activities performed at the facility has revealed that the primary sources of hazardous wastes are enclosed parts cleaners, and furthermore that, based on the volumes of wastes generated, Small Quantity Generator status is currently appropriate for the facility.

Should you have any questions regarding the information provided herein, or if further information is required to process the Notification of Regulated Waste Activity forms, please feel free to contact the undersigned at (781) 749-6771.

Sincerely,

Paul F. Gabriel, P.E.
